Frontend Web Developer

Equifin United

06/2018 – 08/2018

New Delhi, India

Achievements/Tasks

- Built the entire admin dashboard for an upcoming app (UGPG).
- Made significant changes to the payment process and profile picture upload process of the app.

Contact: Abhishek

PERSONAL PROJECTS

Sick Fits

- The app is a full stack graphql application built using Next.Js, Prisma , Yoga Server on the server.
- Apollo GraphQL is used for local state management and to make graphql queries.

Video Sync

- The web application uses Socket.io to sync videos on 2 instances of the app
- Future possibilities of the app include making a chat room to watch synced videos

React-Redux Shopping

- Created a shopping application using React and Redux
- The app was made using best practices and bootstrap was used along to improve the UI of the app

MERN Stack app

- Basic CRUD app that includes auth using JWT and the complete backend written using Node and Express
- The app manages persisting sessions and CRUD operations

Video Renting Service

- The App is a backend API for a video renting application
- The API is completely scalable and is hosted on heruko
- Uses best practices including all types of validations
